

The University of British Columbia

Biohazard Approval Certificate

PROTOCOL NUMBER: **B23-0115**

INVESTIGATOR OR COURSE DIRECTOR: **Steven Hallam**

DEPARTMENT: **Microbiology & Immunology**

Type of Biological Material	Host Range	Biological Material	Species/Source/Commo n Name	Other Information	Building	Room Stored	Room Used	Containment Level
Bacteria	Animals and Humans	Enterococcus	E. faecalis	E. faecalis ATCC 29212	Life Sciences Centre	2534	2524a	2
Bacteria	Animals and Humans	Klebsiella	K. pneumoniae	K. pneumoniae KpGe	Life Sciences Centre	2534	2524a	2
Environmental Samples	Not Applicable	Sewage-feces	Indigenous	Point3 Biotech, Abbotsford, BC	Life Sciences Centre	2534	2524a	2
Environmental Samples	Not Applicable	Sewage-feces	Indigenous	Lulu Island Waste water treatment plant, Richmond, BC	Life Sciences Centre	2534	2524a	2

PROJECT OR COURSE TITLE: **Understanding anaerobic and aerobic digestion microbiomes**

APPROVAL DATE: **June 28, 2023**

START DATE: **June 1, 2023**

EXPIRATION DATE: **June 28, 2024**

FUNDING TITLE: **Opening a Functional Genomic Window an Anaerobic Co-digestion of Mixed Agricultural Waste for Enhanced Biogas Production**

FUNDING AGENCY: **Genome British Columbia**

FUNDING TITLE: **Water to bricks: Harnessing fungal mycelium to produce sustainable architectural biocomposite materials from biosolids derived from wastewater treatment**

FUNDING AGENCY: **Genome British Columbia**

FUNDING TITLE: **Sustainable resource recovery from agricultural waste streams using microbially enhanced bioconversion processes**

FUNDING AGENCY: **Genome British Columbia**

FUNDING TITLE: **Rewiring anaerobic digestion: Engineering anaerobic microbiomes for enhanced resource recovery**

FUNDING AGENCY: **Genome British Columbia**

FUNDING TITLE: **Temperature phased anaerobic digestion with side stream archaea enrichment for Lulu Island wastewater treatment plant digester upgrade**

FUNDING AGENCY: **Natural Sciences and Engineering Research Council of Canada (NSERC)**

UNFUNDED TITLE: **Harnessing the anaerobic and aerobic digestion microbiomes for waste mitigation**

The Principal Investigator/Course Director is responsible for ensuring that all research or course work involving biological hazards is conducted in accordance with the University of British Columbia Policies and Procedures, Biosafety Practices and Public Health Agency of Canada guidelines. Annual review is required.

A copy of this certificate must be displayed in your facility.
